

Participatory Impact assessment (PIA)

Regional Enhanced Livelihood for Pastoral Areas (RELPA) /
Pastoral Area Coordination, Analysis and Policy Support
(PACAPS) / Enhanced Livelihoods in Manderia Triangle
(ELMT)

July 27th to August 1st 2009
Garissa, Kenya

Introduction and Objectives

1. Reach a common understanding of a generic approach for designing PIA, including community identification of impact indicators, the use of participatory methods to measure impact over time and assess project attribution, and triangulation of information using project process monitoring
2. Design, field test and undertake a real time PIA of Community-based Animal Health Programme of VSF-Swiss in Mandera, Kenya.
